

## **Elevator Contractor Licensing Information**

### **License**

All elevator contractors engaged in the business of installing, constructing, repairing, altering, or maintaining elevators must be licensed by the Elevator Safety Board of the Michigan Department of Labor & Economic Growth.

There are three classification types of elevator contractor licenses:

- Class A – Unlimited
- Class B – Maintenance and repair
- Class C – Special types of elevators

### **Duration of License**

Initial licenses are valid until the following December 31. Licenses must be renewed annually.

### **Examination**

All applications must be approved by the Elevator Safety Board and applicants must then pass a written examination of multiple-choice questions. A score of at least 70% is required to pass. The exam is given at the regularly scheduled elevator safety board meetings.

Applicants may prepare for the exam by studying the ASME A17.1-2004, Safety Code for Elevators and Escalators; ASME A18.1-2003, Safety Standard for Platform Lifts and Stairway Chairlifts; the Michigan Elevator Laws and Rules; 1967 PA 227; 1976 PA 333; the current Michigan Electrical Code, NFPA 70; ASME A90.1-2003, Safety Standards for Belt Manlifts; and the ANSI A10.4-2004, Safety Requirements for Personnel Hoists.

### **Requirements & Regulations**

Applicants for licensure must:

1. Have at least 5 years of experience as an elevator constructor or journey person in the type of elevator work for which they desire the license.
2. Provide 2 written references.
3. Pass the written examination.
4. Comply with the rules and regulations of the Elevator Safety Board.

### **Reciprocity**

None.

### **Fees**

Examination fee: \$100.00 (nonrefundable)  
Initial license fee: \$100.00  
Renewal license fee: \$100.00

### **Licensing Authority**

Michigan Department of Labor & Economic Growth

Elevator Examination Applicants  
**Marginal Markings**

The Elevator Safety Division has received several inquiries into the possibility of allowing some type of marginal marks to be allowed in the National Standards used during open book tests for Elevator Journeyperson, Elevator Contractor, and Certificate of Competency examinees. Our research has shown that the Michigan Building Code does in fact have these types of markings printed in the document.

After review and consideration, the Elevator Safety Division has decided to approve only specific marginal markings within the standards used for testing. These marginal markings shall meet the following requirements:

- All margin marks shall be in black ink.
- An asterisk in the margin shall be used to identify sections of the National Standard not adopted by the State of Michigan. The asterisk shall be placed in the margin adjacent to the referenced code section, approximately across from the referenced section number.
- Double vertical lines in the margin shall be used to denote amendments and additions promulgated by the State of Michigan Department of Labor & Economic Growth, modifying any of the following National Standards, ASME A 17.1-2004, ASME A18.1-2003, ASME A90.1-2003, and ANSI A10.4-2004. These double vertical lines shall be in the margin adjacent to the code section. The parallel lines shall start approximately at the top of the referenced code section and shall extend to the bottom of that section and shall be approximately 1/16 inch apart. Also permitted at the beginning of the amended section is the Michigan Rule number, for example Rule1 or M1.

Marginal marks not meeting the specific requirements above shall be considered a violation of the examination rules.

Code books will be checked before and after each exam session to ensure the integrity of the exam is not compromised. Code books may contain index tabs numbered 1 thru 10 corresponding to the referenced code section. No other markings will be permitted within the code book. This includes highlighting, underlining or text aids. Margin notes or other notations will not be permitted in code books during the examination process. Any violations of the examination site rules will result in the surrendering of the examination and the applicant will be asked to leave the examination site. The examination will not be graded and the applicant will have been considered as failing the examination.

Please keep in mind that elevator examinations will be comprised of questions from many different code books. This may result in a need to bring more than one code book to the examination. The requirements stated above pertain to all code books brought to the exam site.
